

● SGLI Event List

Here shows GCOM-C/SGLI orbit control and calibration information during routine observation phase (from March 28, 2018). Initial checkout period (until March 28) is not included because various operations were carried out.

• Some data are missing during the period of Lunar calibration maneuver and Solar diffuser calibration maneuver.

• Please refer to Table2 for more information on missing data regarding the TIR Health check period.

• For the period from "RSP is 1 more than nominal. (Start)" to "RSP is 1 more than nominal. (End)", it indicates that the RSP is one more than the nominal value.
