Notes on recreated products and how to check them

June 2,2023

- The Shikisai products found to be lacking or deficient are recreated, registered, and published on G-Portal, but there is a difference in how it looks.

  ① **New products are added**
  - ➢ When new product was created by the recovery
    (Things that were not created due to processing errors, etc.)
  - ➢ Note:
    - ✓ Reacquisition and additional processing (shift, cutting, format conversion, etc.) may not be possible depending on the recreation method.

  ② **Overwritten/updated with the same file name**
  - ➢ When corrected product was recreated by the recovery
    (Recreated due to lack of input, bug fixes, etc.)
  - ➢ Note:
    - ✓ Identifying the update status from the file name will be difficult, so please be careful when using it.
    - ✓ The "processing date and time" described in the product attribute (Fig.1 on the next page) and the file update date and time in G-Portal's FTP are updated (Fig.2 on the next page).

<How to check the product information of recovery planned>

- about the product information of recovery planned is available on the list of under-investigation items (Japanese only).

<How to identify the product that has been recreated/overwritten (② on the previous page)>

- about the recreated status, please check the product attribute or the release status in G-Portal.
 *) Here, we will use the monthly statistical product (L3), which is scheduled to be recreated in the future, as an example. (LST (March 2022): This is an example of insufficient input.)

Fig. 1 [Product attributes]

The product attribute item "Image_end_time" is 2022/3/05 23:43:33.6, but the date and time will change in the product after recreating and registering.

*It will change to the last date and time entered (2022/3/31 hh:mm:ss.s).

*** And, "Processing_attributes/Processing_UT" will also change to the recreated date and time.**

Fig. 2 [Updated date and time of G-Portal (FTP)]

The update date and time is 2022/9/18 11:09:05, but the date and time will change when recreating or registering.

*Changes to the date and time when the recreated product was registered.
